

## "BRINGING THE GIFT OF WILDLIFE TO OUR CHILDREN!"

Zoo2You is an animal outreach program designed to educate our youth about the incredible wildlife with which we share our planet. It is 'Animal Planet' come to life and brought directly to your classroom. We provide an up-close and hands-on experience with live animals that will both enthrall your students and instill in them a respect and appreciation for wildlife that may indeed last a lifetime. It is our goal to excite and shape young minds, and we are confident that the knowledge and enthusiasm we foster will positively influence this younger generation - the future stewards of our planet.

### **Mission statement:**

Zoo2You is committed to educating our youth about the fascinating world of wildlife biology. Our goal is to provide an exciting, hands-on experience that will inspire a deep interest in the natural sciences.

### **What we offer:**

Zoo2You has presentations that are specially designed according to grade-level, starting at pre-school, all the way up to grade 12. The information covered reflects the age of our audience, and may include such topics as diversity, adaptations, habitat, classification, defense mechanisms, diet, reproduction and social structures.

**"BRINGING THE  
GIFT OF WILDLIFE  
TO OUR CHILDREN!"**

**Our animals are incredible!**

Every presentation incorporates mammals, reptiles, amphibians, and invertebrates - about 15 animals per show. Our animals are well socialized, friendly, and completely safe for a hands-on experience.

**Just some of the gang:**

- Kangaroo
- Wallaby
- African fennec fox
- African bushbaby
- South American honey bear (kinkajou)
- Alligator
- Monitor lizard
- Burmese python
- African tortoise
- Amphibians & Invertebrates

**Teaching aids:**

Zoo2You also incorporates an array of educational tools such as Power-Point, large photos, and museum-quality bones, skulls, tortoise shells and fossils.

**Length of presentations:**

Our presentations are approximately one hour in length and can be accommodated in any classroom, library, or gymnasium.

**Class size:**

We like to limit each program to approximately 30 students. This ensures maximum student participation, a controlled environment that is conducive to learning, and minimal stress for our animals.

**Are your students taking Habitats or Diversity of Living Things?**

Zoo2You has presentations based specifically on these two Addison Wesley modules and they are a perfect way to bring your curriculum to life.

TO OUR CHILDREN!"**

**Testimonials:**

"Thank you so much. Your show was simply incredible. I've never seen the children so enthusiastic and motivated to learn. You tailored it perfectly to our curriculum and they haven't stopped talking about it."

Mr. E. Quaglia  
Grade 4 Teacher  
Talbot Trail Public School

"Wow. What a great alternative to a field trip. Not only was it like having our very own private zoo right in our classroom, but having the children able to touch and hold the animals allowed the students an opportunity of a life-time. It was a truly special event. We can't wait to have you back next year!"

Mr. T. Ryan  
Grade 6 Teacher  
Our Lady of Mount Carmel
